Board of Supervisors
TSR Community Development District

<p><u>ATTENDEES:</u> Please identify yourself each time you speak to facilitate accurate transcription of meeting minutes.</p>

Dear Board Members:

The Board of Supervisors of the TSR Community Development District will hold a Regular Meeting on May 8, 2024 at 6:00 p.m., at the Welcome Center, 2500 Heart Pine Avenue, Odessa, Florida 33556. The agenda is as follows:

1. Call to Order/Roll Call/Pledge of Allegiance
2. Public Comments (*agenda items*) [3 minutes per person]
3. Discussion: Rangeland West Blvd
 - A. Consideration of Landscape Maintenance Professionals, Inc., Addendum 4 to Landscape Maintenance Services Agreement
 - B. 2024 Irrigation Evaluation
4. Discussion: Reuse Water Schedule from Pasco County
5. Consideration of Resolution 2024-05, Approving a Proposed Budget for Fiscal Year 2024/2025 and Setting a Public Hearing Thereon Pursuant to Florida Law; Addressing Transmittal, Posting and Publication Requirements; Addressing Severability; and Providing an Effective Date
6. Consideration of Resolution 2024-06, Designating Dates, Times and Locations for Regular Meetings of the Board of Supervisors of the District for Fiscal Year 2024/2025 and Providing for an Effective Date
7. Consideration of Fence/Wall Request at 13044 Wildgrass Trail
8. Acceptance of Unaudited Financial Reports as of March 31, 2024
9. Approval of April 10, 2024 Regular Meeting Minutes
10. Action & Completed Items

11. Staff Reports

- A. District Counsel: *Kutak Rock, LLP*
- B. District Engineer: *Johnson Engineering, Inc.*
- C. District Manager: *Wrathell, Hunt and Associates, LLC*
 - NEXT MEETING DATE: June 12, 2024 at 6:00 PM
 - QUORUM CHECK

SEAT 1	DAVID DEENIHAN	<input type="checkbox"/> IN PERSON	<input type="checkbox"/> PHONE	<input type="checkbox"/> NO
SEAT 2	FRANK STALZER	<input type="checkbox"/> IN PERSON	<input type="checkbox"/> PHONE	<input type="checkbox"/> NO
SEAT 3	KAREN ANDERSON	<input type="checkbox"/> IN PERSON	<input type="checkbox"/> PHONE	<input type="checkbox"/> NO
SEAT 4	MATT BRUNO	<input type="checkbox"/> IN PERSON	<input type="checkbox"/> PHONE	<input type="checkbox"/> NO
SEAT 5	MARY COMELLA	<input type="checkbox"/> IN PERSON	<input type="checkbox"/> PHONE	<input type="checkbox"/> NO

- D. Lifestyle Director & Amenity Manager: *Arch Amenities Group*
- E. Operations Manager: *Wrathell, Hunt and Associates, LLC*

12. Supervisors' Requests

13. Public Comments (*non-agenda items*) [3 minutes per person]

14. Adjournment

Should you have any questions, please do not hesitate to contact me directly at (239) 464-7114.

Sincerely,

Chesley E. Adams, Jr.
District Manager

**LANDSCAPE MAINTENANCE SERVICES AGREEMENT
FOR
TSR CDD
ADDENDUM 4
RANGELAND WEST BLVD
(SEE ATTACHED MAP)**

LMP agrees to service and maintain irrigation system in conjunction with the specifications outlined in the landscape maintenance agreement that went into effect January 1, 2023.

This addendum will change the landscape maintenance services invoice by \$3,950.00 per month. The new invoice amount will increase from \$137,606.67 per month to \$141,556.67 per month.

This change in normal billing is effective APRIL 1, 2024 and will remain in effect as part of the landscape maintenance services agreement.

In witness whereof the parties to this agreement have signed and executed this addendum effective the _____ day of _____, 2024.

TSR CDD – IRRIGATION EVALUATION & RECOMMENDATIONS

The purpose of this document is to provide the analysis of the current irrigation system at Starkey Ranch. The analysis will include which controllers and water sources should be considered for adding well supplied water and the reasons for the recommendation. This document will also provide information concerning the application for variances on some of the controllers and the underlying reason for these recommendations as well. If obtaining a variance will solve the issue of irrigation availability would solve the problem, then only a variance is recommended. If the situation is more dire, a well is recommended. In some instances, both a well and a variance are needed. This document is technical in nature. It is provided to be used in your water use application to SWFWMD application and for any variance.

First it should be understood that each controller analyzed has its own reclaimed water supply from a reclaimed meter. So, each controller represents a single source irrigation system that can operate independently from all other controllers located within Starkey Ranch. Determination of which controllers need action taken is based on two factors, time, and water source availability. Most if not all the controllers examined are Hunter ACC or ACC2 controllers. These controllers have the capability to run multiple zones simultaneously if an adequate water source is available. The controllers are also capable of performing automatic adjustments based on the current weather conditions when attached to an adequate water source. It should be noted that at the current time the Pasco County Reclaimed Water Utility is not reliable enough to use any of these advanced features.

There are four distinct types of irrigation in use at Starkey Ranch. Rotor and Rotator irrigation. Rotor heads shoot a single stream of water. The top of the head rotates distributing the water over the designated area. A rotator head shoots multiple streams of water while spinning to distribute water over the designated area. On this site the type of rotor heads used have a typical spacing of 35 feet. Rotators are spaced from 5 feet down to 32 feet depending on the pattern. As shown in the manufacturers design catalogs, rotors will perform optimally at 45 PSI while rotators require 40 PSI. This pressure should be measured at the head. In this document rotors and rotators are considered with the same 45 PSI minimum pressure requirement as there are few rotator zones and they have not been documented specifically as rotators. The current documentation lists them as rotors. Rotor and rotator heads will decrease the distance water is distributed as the pressure is reduced causing gaps in coverage. Spray heads have a fan shaped output and come in nozzles designed to through water from 2 feet up to 18 feet. The manufacturer design catalog specifies 35 PSI as the optimal pressure for operation. This pressure again is the pressure at the head. Drip irrigation is not considered for the purpose of this evaluation. Drip irrigation typically can work well down to about 25 PSI at the point where it connects to the PVC pipe if designed properly. It can also be run at any time of day that there is enough pressure to achieve sufficient pressure. Tree Bubblers were not considered in this analysis. Most trees once established do not need supplemental watering. However, there are some tree varieties that do need additional water during the year at Starkey Ranch.

TSR CDD – IRRIGATION EVALUATION & RECOMMENDATIONS

The landscape also affects the recommended actions provided in this document. While some varieties of the shrubs and trees do require additional supplemental watering, they have not been considered for the purpose of these recommendations. They require far less water than turf grass and most of the shrubs and trees can be watered during low pressure from the reclaimed system at times that are not authorized for turf grass. The turf grass (Zosia, St. Augustine, Perennial Peanut) require most of the run times from the controllers and are the most heavily regulated areas.

The current issues are not due to improper design at the time of construction of the existing systems. Assuming Pasco County was providing the design pressure of 65 PSI at the point of connection, 2 zones would have been able to run simultaneously on all controllers. Pressure availability and allowed run time would have been from 4pm to 10 am at least two days per week. This would have satisfied the irrigation requirement on every system at Starkey Ranch. In addition, many of the systems have a weather station installed and would have provided automatic adjustments for weather conditions.

On the following page is Table 1.

The priority specifies the order in which the issues should be addressed. As we can see Controller O has the highest priority. The required run time for rotor heads is 51.1 hours based on the daily average ET for one week to meet the water requirements during the month of May. Average daily ET in May is .19 inch. One week would require 1.33 inches of precipitation to replace the moisture lost due to Evaporation and Transpiration. This is an approximation as there is no source for the crop coefficient for Zosia turf grass. Run time is based on calculation. Since there was no source to allow a more specific calculation of ET, I used a more generous precipitation rate of .45 inches per hour for the rotor heads. The typical precipitation rate for rotors using a 1.5 gpm nozzle for 90 degrees of rotation and matching that for half, three quarte and full circle heads spaced at 35' would be about .36 inches an hour. So, the actual run time used is 80% of what the real run time would be for 1.33 inches of water. Rotor efficiency was 96% for the calculation. This should be close to what Zosia would need if we had a crop coefficient to use in the ET calculation. We calculated all zones for Zosia turf as it is the predominate turf for Starkey Ranch. Spray zones run times were calculated in a similar fashion but used an efficiency of 75% due to the high precipitation rate. Most soils can not take in 1.5 inches per hour of precipitation leading to greater loss of water due to runoff. Spray zones on controller O would account for an additional 7.5 hours of operation. Total run time per week of 58,6 hours. The current limit of 4pm to 10 am for properties greater than 2 acres two days a week would provide only 36 hours a week of available run time. Unfortunately, Pasco County Utilities no longer turns up pressure until 6pm and turns off pressure at 8am if not sooner. This further reduces availability to below 28 hours a week. Even if Pasco County Utilities provided 55 PSI for the 18 hours per county water restrictions, a variance would be needed for this controller. Only having 65PSI consistently throughout the allowable period, could this controller provide adequate irrigation as running 2 zones simultaneously would be necessary during the most demanding conditions.

TSR CDD – IRRIGATION EVALUATION & RECOMMENDATIONS

Priority	Controller	Rotor Runtime in hours	Spray Runtime in hours	Action Required
1	O	51.1	7.5	Well and Variance Runtime exceeds the maximum 36 hours. Run times exceed hours of pressure supplied by the county.
2	Q	12.2	50.4	Well and Variance Runtime exceeds the maximum 36 hours. Run times exceed hours of pressure supplied by the county.
3	U	29.2	13.1	Well and Variance Runtime exceeds the maximum 36 hours. Run times exceed hours of pressure supplied by the county.
4	S	19.5	28	Well and Variance Runtime exceeds the maximum 36 hours. Run times exceed hours of pressure supplied by the county.
5	D	19.5	20.5	Well and Variance Runtime exceeds the maximum 36 hours. Run times exceed hours of pressure supplied by the county.
6	Y	12.2	36.4	Well and Variance Runtime exceeds the maximum 36 hours. Run times exceed hours of pressure supplied by the county.
7	T	9.7	34.6	Well and Variance Runtime exceeds the maximum 36 hours. Run times exceed hours of pressure supplied by the county.
8	E	21.9	6.5	A variance should be applied for as the total run time exceeds the time that pressure is available from the counties reclaimed system.
9	A2	17	18.7	A variance should be applied for as the total run time exceeds the time that pressure is available from the counties reclaimed system.
10	P	14.6	19.6	A variance should be applied for as the total run time exceeds the time that pressure is available from the counties reclaimed system.
11	R	0	30.8	A variance should be applied for as the total run time exceeds the time that pressure is available from the counties reclaimed system.
12	J	14.6	14	A variance should be applied for as the total run time exceeds the time that pressure is available from the counties reclaimed system.
13	C	9.7	18.7	A variance should be applied for as the total run time exceeds the time that pressure is available from the counties reclaimed system.
14	H	9.7	17.7	No action is required

23	M	7.3	2.8	No action is required
24	N	0	9.3	No action is required
25	G	4.9	2.8	No action is required
26	X	0	5.6	No action is required
27	Z	2.4	1.9	No action is required

Table 1

TSR CDD – IRRIGATION EVALUATION & RECOMMENDATIONS

Additional factors affecting the necessity to install wells and pursue variance approvals are based on the availability of Pasco County Reclaimed Water. Using Figure 1 below, We can see that starting at 1800 which is 6pm he have good pressure. However, the pressure decreases to below 55 PSI quickly. We need 45 PSI at the head so we have to allow for friction loss in the backflow, electrically operated globe valves, pipe and other system components. On a typical day we are lucky if we have sufficient pressure to operate rotors for 6 hours. While this graph shows good pressure prior to 6pm it should be noted that Pasco County start to turn the pressure up about 5:15 to 5:30 pm. We have pressure data at the point of connection on the inlet side to the backflow for almost a year that can be provided. There is no opportunity to start irrigation at 4pm as specified by county ordinance for properties greater than two acres. As you can see, the pressure is not adequate to water to 10 am either for rotors, rotators, or spray heads. Viable pressure for sprays ends at approximately 3 am in the graph below.

Figure 1

As can be seen in Figure 2, conditions are not consistent. The programs on controllers are not capable of adjusting for periods that do not meet expectations. The inconsistency leads to areas that do not get coverage on every application. This leads to the necessity to supplementally water on days water pressure is left up for leak testing.

Recommendations are based on the average time that pressure is adequate for rotor operation and then spray operation. Rotor pressure is more limiting than spray pressure and is the prime factor on most controllers. However, some controllers have many spray zones requiring more time than is available for operation within the limits of the hours the supply meets the required conditions.

TSR CDD – IRRIGATION EVALUATION & RECOMMENDATIONS

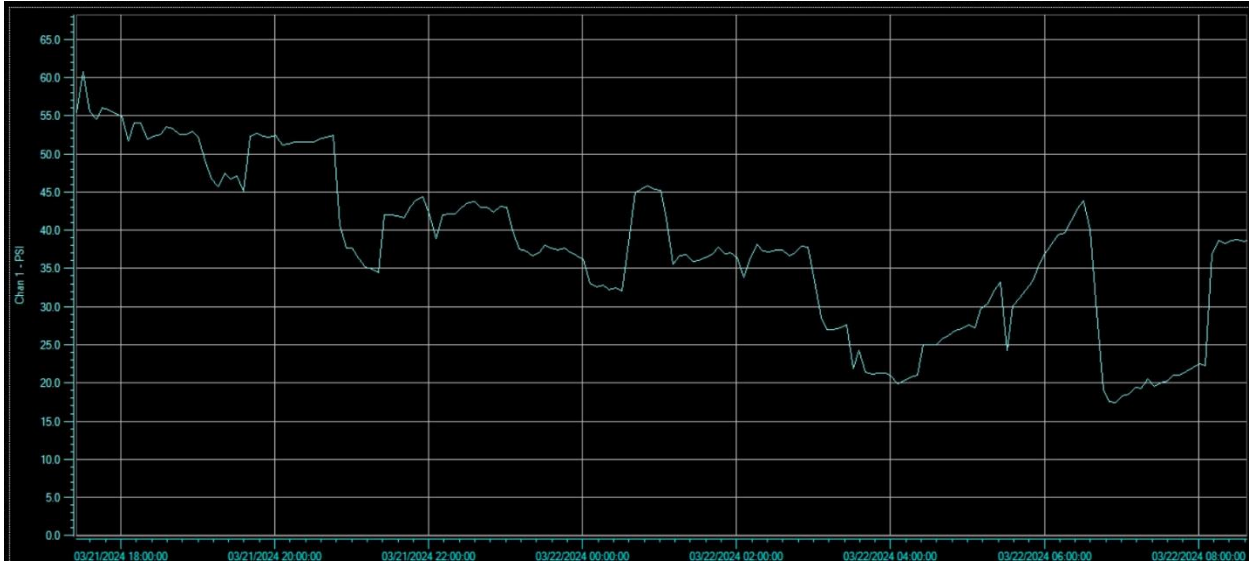

Figure 2

Wells are needed on many controllers to provide a stable water source from 4pm to 10 am as is allowed under the county ordinance. In this case Landscape Maintenance Professionals recommends one 5hp 4 inch well per controller. This recommendation is since there is an electric service located at each controller. The main line is located near each controller to allow the well to be attached to the system and 5hp will allow one zone per controller to operate effectively. However, this also means that in addition to a well installation, in many cases it would be necessary to acquire a variance to allow for sufficient irrigation in the hotter drier months like April, May and September. If the desire is to achieve this without a variance a 7.5 hp pump would be required to supply enough water to run two zones simultaneously. This may require the electrical supply to be upgraded, adding additional costs. A well at each location eliminates the necessity to control cost as much larger pumps and well or pond feed large pumping systems would cost hundreds of thousands of dollars.

The screen shot in Figure 3 shows the current water restrictions for Pasco County Reclaimed Water. Please note the notation under the table provided about properties of 2 acres or more in size. This expands the hours of irrigation from 4 pm to midnight and from midnight to 10 am. So using tow programs and separating the zones into those programs one can water on the day assigned 18 hours of irrigation if there were a consistent adequate water supply.

TSR CDD – IRRIGATION EVALUATION & RECOMMENDATIONS

Figure 3

In conclusion, the reason for making these changes is based on the current inconsistent pressure and availability of the Pasco County Utilities Reclaimed Water System. I have spoken to Brent Reiz at Pasco County Utilities, and he has not been able to provide any information that indicates the situation will be improved anytime in the near future. The current situation has slowly deteriorated over the past four years with each year showing greater time frames of low pressure supplied from the system. We anticipate that the issues will continue for years to come and feel it necessary to be proactive in addressing the issues. Starkey Ranch is continuing to convert turf areas to plant beds to reduce irrigation requirements. However, changing the landscape requires a much larger investment than pursuing variances and installing wells.

Should anyone involved in the approval process for a water use permit, well permit or variance require additional pressure data information, you may contact Samuel Martel LMP Construction Manager. Email Samuel.Martel@LMPpro.com or by phone 813 3658445.

RE: LANDSCAPE DROUGHT STRESS AND WATER RESTRICTIONS

Dear Customer,

As we transition out of winter, Spring is upon us and we are experiencing higher than normal temperatures and dryer conditions. With that said, we now are experiencing drought-like conditions impacting landscapes around the Bay area. It is our duty as your landscape maintenance provider to communicate our concerns and make you aware of current conditions and the potential impact to your landscape as well as offer solutions.

We take pride in looking out for your largest uninsured asset. It is our duty to inform you of the possible options to consider during this time period. Uncommon conditions call for uncommon solutions, which is why you have Landscape Maintenance Professionals as your vendor of choice.

For a complete list of current water restrictions by city and county, I'd encourage you to log on to www.watermatters.org or follow this link for full details:

<http://www.swfwmd.state.fl.us/conservation/restrictions/swfwmd.php>

Please sign below to indicate the best option for your property:

- 1. Please increase the number of irrigation watering days and disregard any local watering restrictions. Customer will assume responsibility for all irrigation fines and fees associated with these adjustments.

- 2. Please provide supplemental watering via water tanker to the areas of the property showing signs of stress. Landscape Maintenance Professionals, Inc. agrees to provide this service at a minimum charge of \$500.00 plus an hourly rate of \$55.00 per hour. Before any services will be performed, customer will have to approve in writing the date and hours of service needed. Customer also agrees to allow LMP the opportunity to refill water tank on property, if water is available.

- 3. Continue to perform monthly inspections and adjustments as currently being done. In essence, keep the level of service the same with no changes. Customer understands there is potential for plant and turf damage or loss due to current weather conditions.

- 4. Apply a wetting agent to the turf and plant material to keep moisture stored so that the plants can uptake it as needed. The cost to apply the agent is \$14.50 per 1,000 sq. ft. treated area with a minimum charge of \$500.00.

- 5. Assist property in water variance application process through the local governmental regulatory agency. The administrative costs to help with the process will start at \$350.00. The timetable for this process, if approved, is roughly 3-4 months.

We truly appreciate your business and look forward to getting through the current conditions with you as a partner. If you have any questions at all, please do not hesitate to contact our office, or feel free to email me at scott.carlson@lmppro.com.

Property Name: _____

Respectfully,
Scott A. Carlson – Chief Operating Officer

DESCRIPTION	QTY	COST	TOTAL
Water truck areas in need of water, per day.	1	750.00	750.00

TERMS AND CONDITIONS:

TOTAL	\$750.00
--------------	-----------------

LMP reserves the right to withdraw this proposal if not accepted within 21 days of the date listed above. Any alteration or deviation to scope of work involving additional costs must be agreed upon in writing as a separate proposal or change order to this proposal. Periodic invoices may be submitted if job is substantial in nature with final invoice being submitted at completion of project. No finance charge will be imposed if the total of said work is paid in full within 30 days of invoice date. If not paid in full within 30 days, then customer is subject to finance charges on the balance of the work from the invoice date at a rate of 1.5% per month until paid. LMP shall have the right to stop work under this contract until all outstanding amounts including finance charges are paid in full. Payments will be applied to the oldest invoices. If paying by credit card, please add a 3% processing fee of the Invoice Total.

ACCEPTANCE OF PROPOSAL: The above prices, scope of work and terms and conditions are hereby satisfactorily agreed upon. LMP, Inc. has been authorized to perform the work as outlined and payment will be made as outlined above. The above pricing does not include any unforeseen modifications to the said irrigation system that could not be reasonably accounted for prior to job start. All plant material carries a one (1) year warranty provided LMP, Inc. is performing landscape maintenance services to the area installed or enhanced at the time of installation. If not, then there is no warranty on the plant material. LMP cannot warranty against Acts of God, including cold weather events & natural disasters. Also, no warranty will be provided on any material that has been transplanted from another part of the property.

OWNER / AGENT

DATE

Ecologel[®]
SOLUTIONS LLC

PRESENTS

Hydretain[®]
ROOT ZONE MOISTURE MANAGER

Over 20 years experience providing environmentally responsible solutions for:

- **Water Conservation**
- **Dust Mitigation**
- **Protection Against Mold, Mildew, Fungus & Algae**
- **Biological Lake and Pond Clarifiers**
- **Seaweed Extract Biostimulants**
- **Broad Array of Specialty Nutrients**
- **Advanced Soil Amendments**

Hydretain®

**Environmentally Responsible
Technology Proven to Reduce
Watering Requirements up to
50% or more...**

**for use on Lawns, Flowers,
Shrubs, Trees, Food Crops
and Gardens**

Hydretain ES Plus is USDA Certified Biobased Product

How Does Hydretain® Work?

A liquid blend of **HYGROSCOPIC** and **HUMECTANT** compounds, Hydretain draws water vapor molecules together forming plant usable water droplets.

- **HYGROSCOPIC:** ABSORBING OR ATTRACTING MOISTURE FROM THE AIR.
- **HUMECTANT:** A SUBSTANCE THAT ABSORBS OR HELPS ANOTHER SUBSTANCE RETAIN MOISTURE.

THE Hydretain[®] EFFECT

Individual water molecules, as vapor or humidity in the soil, are not usable by plant roots and are constantly being lost to evaporation.

Untreated Plant Roots
(Magnified for clarity)

Hydretain Treated Roots

Hydretain attracts water molecules, forming plant-usable droplets on treated root hairs.

Hydretain Reduces Evaporative Loss

- Subsurface Moisture Vapor (Humidity) is Unavailable to Plant Roots, Just as We Are Unable To Drink the Humidity in the Air Around Us
- By Attracting and Storing Water Vapor Molecules, Hygroscopic Humectants, Create Microscopic Droplets – Similar to Watching Condensation Form on a Cold Glass
- This Process Helps Plants Use Soil Moisture Vapor that Would Otherwise be Unavailable to the Plant and Lost to Evaporation.

Originally Developed in Australia as a Roadway Dust Suppressant

**Untreated Road Section
Heavy Dusting**

**Same Truck on Treated Surface
Minimal Dusting**

Hydretain[®] First Tested on Turf

During a six week drought period

The entire lawn was as green and healthy looking as the center section prior to a six week drought.

Richard K. Irwin
Ecologist U.S.A.
5001 Rio Vista Ave.
Tampa, FL 33634-5321

Dear Rick:

Terril and I have recently conducted trials on geraniums. The plants were grown in 4-inch pots and compared to a water-only control. The hydretain treated plants were under heavy shade cloth to most gardeners.

The effect of hydretain was dramatic; a 25% increase in water management product that came close to doubling the time a plant could go without water. In terms of numbers of pots, we have never seen another product that came close to doubling the time a plant could go without water. In 1989, there were 98.1 million geraniums produced in the U.S. Probably 75 million were sold in the U.S. Probably 75 million were sold in the U.S. Probably 75 million were sold in the U.S.

Sincerely,

James E. Barrett
Professor

GROWING TRENDS: Jim Barrett

New media-applied humectant can improve plants' drought resistance

Severe wilting of bedding plants in retail display areas is a common situation that often causes growers to lament about the degradation of the plants' appearance after they leave the greenhouse.

The poor appearance at the retail level is also thought to reduce demand for bedding plants. Too frequently, personnel at retail garden centers and mass-merchandise stores are too busy to perform needed routine maintenance of plant material, and often bedding plants are not irrigated until they are wilting.

At the University of Florida, Terril Nell and I have been evaluating Hydretain, a water-management product that is applied to growing media as a liquid, so plants can be treated by growers just before they are shipped.

Hydretain has been developed by Ecologist USA, 5001 Rio Vista Ave., Tampa, Fla. 33634; (813) 886-5700. It is now available to growers.

In our research, Hydretain was diluted in ratios of 1:5 to 1:20, and 3-ounce solutions of these ratios were poured into 4-inch pots containing geraniums, impatiens or vinca. The plants were grown using standard production practices and were at marketable size when treated. After treatment, plants were placed under heavy shade cloth to represent a typical retail area. Plants were not watered until they wilted.

Geraniums given plain water lasted five days, while the treated plants went nine to 11 days before wilting.

For impatiens, plants were held until they wilted a second time. The impatiens given Hydretain at 1:10 and 1:15 wilted, for the second time, two to three days later, and the medium absorbed more water when it was irrigated.

Vinca also lasted longer when treated with Hydretain.

Jim Barrett is professor in the Department of Environmental Horticulture at University of Florida, Gainesville, Fla. 32611.

Table 1
Hydretain treatments on 'Red Elite' geraniums in 4-inch pots

Hydretain dilution ¹	Days to wilt
Control	5
1:20	10
1:15	9
1:10	10
1:5	11

¹ Each pot received 90 ml (3 fluid ounces) of Hydretain solution. Control plants were given plain water.

The plants given Hydretain at the 1:10 dilution wilted first at eight days, compared to four days for the non-treated plants, and second wilt occurred at 14 days, compared to eight days for the water-only plants.

In these trials, Hydretain was impressive in delaying wilting. The manufacturer indicates that Hydretain is a humectant, allowing it to hold more moisture in the medium.

Minor precautions avoid problems

We have performed additional studies with Hydretain and have found few problems with its application.

It does not burn foliage when applied directly to leaves. On occasion, we have seen slight wilting of plants immediately after treatment with the 1:5 dilution when Hydretain was applied during hot conditions. Therefore, dilutions of 1:10 will most likely be the recommended rate. When a slight overtreatment occurred, it was alleviated by watering and there were no observable problems.

Table 2
Hydretain treatments on 'Super Elfin Red' impatiens in 4-inch pots

Hydretain dilution ¹	Days to first wilt ²	Water absorbed ³ (ml)	Total days to second wilt ⁴
Control	3	148	5
1:20	3	132	5
1:15	4	172	8
1:10	4	167	7
1:5	5	121	7

¹ Each plant received 90 ml (3 fluid ounces) of Hydretain solution. Control plants were given plain water.

² Days from treatment to wilt.

³ At first wilt, plants were given 180 ml (6 fluid ounces) of water. This is total days from treatment to second wilt.

⁴ Total days from treatment to second wilt.

Table 3
Hydretain treatments on 'Little Bright Eyes' vinca in 4-inch pots

Hydretain dilution ¹	Days to first wilt ²	Total days to second wilt ³
Control	4	8
1:20	5	10
1:15	5	11

Clemson University

Poinsettia Trials Baucom's Greenhouse – Summerville, SC

COOPERATIVE EXTENSION SERVICE

Baucom's Nursery in Summerville, SC, had a problem maintaining enough water on the outer edge of their poinsettia crop using overhead sprinklers. Hand watering was the first approach to solving this problem, however, this employee was needed for addressing other tasks. Therefore, an alternative to hand watering was needed. On October 2, 1998, an experiment was set up to test the effectiveness of Hydretain 2X formula to eliminate hand watering.

Two test plots were used on opposite sides of the greenhouse. Two plots using four rows of twenty plants along the edge closest to the greenhouses' outer walls were selected since these plants showed signs of wilt first. On one side of the greenhouse the first ten plants and four rows were treated with just water. The remaining plants, eleven through twenty, were treated with Hydretain at the rate of 2.0 ounces per gallon (64-1). All plants were watered to run off. On the opposite side of the greenhouse this arrangement was reversed. The first ten plants and four rows were treated with Hydretain and the remaining plants were treated with just water. All plants received equal amounts of solution on the day the experiment started. From October 2, until harvest these plants would only receive the water provided from the overhead sprinklers.

A few weeks into the experiment it was evident that the plants treated with Hydretain were out performing the other plants. On week six of the experiment pictures were taken of the plants from the outer most corner of the experiment. These plants were selected to demonstrate the dramatic difference in growth between the two treatments. The plants treated with Hydretain were larger in size, retained more leaves, and developed a larger root system compared to the plants on "just water". In addition, the plants grown under "just water" were not salable.

Based on this study we believe Hydretain offers growers a solution to those "dry edges". These positive results and other research have shown Hydretain offers solutions to many moisture management issues such as; increased shelf life, better moisture management on plugs, reduced watering time, and increased germination.

Evaluation of Tomato Transplant Production Methods for Improving Establishment Rates

Additional index words: cold hardening, soluble carbohydrates, Hydretain, ethephon, pretransplant nutritional conditioning, *Lycopersicon esculentum*, chilling injury

Abstract. Eight different tomato (*Lycopersicon esculentum* Mill.) transplant production methods were tested during two growing seasons (1993-94) to determine their effectiveness in increasing both establishment rate and yield. Seven-week-old greenhouse grown transplants of 'Hypeel 696' were shipped from Florida to Pennsylvania and planted at the Pennsylvania State Univ. Horticulture Research Farm. Transplants were also grown at the Pennsylvania State University to compare their growth with that of southern-grown plants. In 1993, increased nutrient levels during the last 10 days of transplant production significantly increased transplant size, establishment rate, and early yields, while the addition of Hydretain®, an aid to water retention and uptake, significantly increased total yield. In 1994, plants from Florida that were chilled for 7 days before transplanting and the Pennsylvania-grown plants had faster establishment rates than did nonchilled plants from Florida, but differences in yield were nonsignificant. Chilled and Pennsylvania-grown plants had significantly higher soluble carbohydrate levels in leaves, stems, and roots than did nonchilled and Florida-grown plants, while nutrient-conditioned plants had higher levels in leaves and stems. Establishment rate was not correlated with carbohydrate level. Chemical name used: (2-chloroethyl) phosphonic acid (ethephon).

Tomato transplants comprise about one-third of all vegetable transplants grown for field production in the United States, with more than 500 million plants produced annually in Florida alone (U.S. Dept. of Commerce, 1991; Vavrina and Sommersell, 1992). One of the most critical steps in producing tomatoes from transplants is the initiation of new growth after planting in the field. This plant establishment is important for producing uniform stands that can compete effectively against weed and insect pressure (Orzolek, 1991). However, a wide range of environmental factors, such as extreme temperatures and reduced water and nutrient availability, can reduce the establishment rate.

Several different treatments have been evaluated for hardening plants to unfavorable environmental conditions. Cold tolerance of tomato seedlings increased after exposure to low temperatures (Pardossi et al., 1988; Wheaton and Morris, 1968), and ethephon

application to tomato transplants increased survival rates in the field following a frost (Liptay et al., 1982). Pretransplant nutritional conditioning (PNC), the application of additional nutrients during the production cycle, increased both shoot growth before transplanting and early and total yields (Melton and DeJaff, 1991). Low water availability has been alleviated through the addition of Hydretain®, a humectant that improves water retention in the soil and water uptake by the plant. Watering potted plants with Hydretain® increased the number of days to wilting for several different crops (Barrett, 1991).

Although many methods for improving tomato transplant growth and yield have been developed, the plant characteristics responsible for these improvements still are not well understood. High levels of nutrients in the plant tissue at the time of transplanting may be one factor which determines establishment rate. For example, N levels in tomato shoots at the time of transplanting were correlated with the rate of root growth in the field (Liptay and Nicholls, 1993). These nutrients may serve as a reserve that the plant can draw on after transplanting if nutrient availability and uptake are reduced. Another factor that may affect establishment is the carbohydrate level in the tissue. Again, these carbohydrates could

act as an energy reserve to fuel plant growth if carbon fixation is reduced after transplanting. Also, levels of soluble carbohydrates, such as glucose, fructose, and sucrose, have been correlated with increased cold tolerance in tomato (Keller and Steffen, 1995; King et al., 1988), which may in turn lead to a faster overall growth rate. The purposes of this study were to 1) identify tomato transplant production methods that increase establishment rates and yield, and 2) determine whether high soluble carbohydrate levels before transplanting hasten establishment.

Materials and Methods

Plant materials. All transplants, except those grown in Pennsylvania, were grown in greenhouses at the Southwest Florida Research and Education Center in Immokalee, Fla. (1993) or at Speedling, Bushnell, Fla. (1994), then shipped to Pennsylvania for planting in the field. Seeds of 'Hypeel 696' (Pretreated Seed Co., Saticoy, Calif.), a processing tomato cultivar, were sown into a nonsterilized plug mix in polystyrene Todd planter flats, size 880 (Speedling, Bushnell, Fla.). Cells in the tray were inverted pyramids with a width of 2.0 cm, a depth of 4.1 cm, and a volume of 5.6 cm³. The transplants were grown by the Speedling II system, which includes an ebb and flow watering system with constant feeding of nutrients (Thomas, 1993). Further details on commercial cultural practices were proprietary. Seven weeks after seeding the plants were shipped in their trays to Pennsylvania and planted within 3 d.

For comparison plants were grown for 6 weeks in greenhouses at the Horticulture Research Farm, Russell E. Larson Research Center, Rock Springs, Pa. Cultivar, cell size, and plug mix were identical with those used in Florida, but the plants were watered about once daily by overhead irrigation instead of the ebb-and-flow system. The plants were placed in a cold-frame for 1 week before transplanting. No additional treatments were applied.

Treatments applied to Florida-grown plants. The following six treatments were applied: 1) Roots were drenched one day before shipping with Hydretain® (Ecologel USA, Tampa, Fla.), which contained 35.2% hydro-processed simple sugars, 1.5% calcium lignosulfonate, and 63.3% inert ingredients applied at a concentration of 6.7% Hydretain®; 2) Ethephon (Ethrel®; Amchem Corp., Ambler, Pa.) was sprayed onto the foliage to the drip stage at 75 or 150 mg L⁻¹ a.i.; 3) GLK 8903, an experimental liquid product (proprietary) designed to reduce chilling damage (Great Lakes Chemical Co., West Lafayette, Ind.) was sprayed onto the foliage to the drip stage at 5 mL L⁻¹; 4) Roots were soaked in a 1% P solution for 1 h; 5) Transplants were treated every 3 d starting 10 d before shipping (four applications total) by soaking the trays in a nutrient solution of N (200 mg kg⁻¹ P (40 mg kg⁻¹), and K (100 mg kg⁻¹) for 1 h. In 1994, the N concentration was reduced to 80 mg kg⁻¹; 6) Transplants were chilled in a growth

BASIC WELL AUTHORIZATION AND DEPLOYMENT PLANNING

The information being provided below is a guide and is based on initial discussion with the parties involved with this potential solution. The costs and lifespans quotes are not guaranteed, they are estimates.

○ **WELL USE PERMIT**

Water Use Permit (WUP) authorizes the consumptive use of particular quantities of ground or surface water. The Florida Statutes (Chapters 120 and 373) and Florida Administrative Code (Chapters 40D-1 and 40D-2) prescribe rules for applying for a water use permit. The applicant submits the application form, all required supplemental information forms, and all required documentation so that the District Water Use Permit Bureau evaluation staff can determine if the use of water is reasonable and beneficial, does not interfere with any presently existing legal use of water, and is consistent with the public interest.

The landowner is required to apply for the permit. The application will likely require the use of legal services and a 3rd party to complete the application process.

○ **BUDGETING**

Each well is estimated to cost between 16,500 to 20,000 in construction costs. The cost of each well will vary based upon the depth of the well and other site-specific factors. The current recommendation is for eight (8) wells to be approved to supplement the current reclaimed supply. The District will also need to budget for WUP application fees.

WUP Fees		Effective May 19, 2014
Fee Categories	Fee	
Water use permit application fees shall be as follows:		
(a) For a Chapter 40D-2, F.A.C., individual permit that authorizes annual average quantities from any source or combined sources that is 500,000 gpd or greater, the fees shall be as follows:		
1. new individual permit no greater than 10 years	\$1,000	
2. new individual permit no greater than 20 years	\$2,000	
3. renewal individual permit no greater than 10 years	\$750	
4. renewal individual permit no greater than 20 years	\$1,500	
5. individual permit modification	\$300	
6. individual permit temporary	\$200	

○ **MAINTENANCE / REPLACEMENT**

Planning for maintenance and motor replacement are essential. The District will need to budget for these items. Well pumps can last 5-7 years.

○ **POWER SOURCE**

A power source will be needed for each well. There may be a cost involved to bring power to each potential well location. There will be an increase in budgeted electricity to provide power to the wells.

○ **WATER CONSUMPTION**

Under the current restrictions, well use appears to be limited to Friday(s)

Water Restrictions Using Well & Surface Water				
Watering Days and Times

RESOLUTION 2024-05

A RESOLUTION OF THE BOARD OF SUPERVISORS OF THE TSR COMMUNITY DEVELOPMENT DISTRICT APPROVING A PROPOSED BUDGET FOR FISCAL YEAR 2024/2025 AND SETTING A PUBLIC HEARING THEREON PURSUANT TO FLORIDA LAW; ADDRESSING TRANSMITTAL, POSTING AND PUBLICATION REQUIREMENTS; ADDRESSING SEVERABILITY; AND PROVIDING AN EFFECTIVE DATE.

WHEREAS, the District Manager has heretofore prepared and submitted to the Board of Supervisors ("**Board**") of the TSR Community Development District ("**District**") prior to June 15, 2024, a proposed budget ("**Proposed Budget**") for the fiscal year beginning October 1, 2024 and ending September 30, 2025 ("**Fiscal Year 2024/2025**"); and

WHEREAS, the Board has considered the Proposed Budget and desires to set the required public hearing thereon.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF SUPERVISORS OF THE TSR COMMUNITY DEVELOPMENT DISTRICT:

1. **PROPOSED BUDGET APPROVED.** The Proposed Budget prepared by the District Manager for Fiscal Year 2024/2025 attached hereto as **Exhibit A** is hereby approved as the basis for conducting a public hearing to adopt said Proposed Budget.

2. **SETTING A PUBLIC HEARING.** A public hearing on said approved Proposed Budget is hereby declared and set as follows:

DATE: _____

HOUR: 6:00 p.m.

LOCATION: Welcome Center
2500 Heart Pine Avenue
Odessa, Florida 33556

3. **TRANSMITTAL OF PROPOSED BUDGET TO LOCAL GENERAL PURPOSE GOVERNMENT.** The District Manager is hereby directed to submit a copy of the Proposed Budget to Pasco County at least 60 days prior to the hearing set above.

4. **POSTING OF PROPOSED BUDGET.** In accordance with Section 189.016, *Florida Statutes*, the District's Secretary is further directed to post the approved Proposed Budget on the District's website at least two days before the budget hearing date as set forth in Section 2 and shall remain on the website for at least 45 days.

5. **PUBLICATION OF NOTICE.** Notice of this public hearing shall be published in the manner prescribed in Florida law.

6. **SEVERABILITY.** The invalidity or unenforceability of any one or more provisions of this Resolution shall not affect the validity or enforceability of the remaining portions of this Resolution, or any part thereof.

7. **EFFECTIVE DATE.** This Resolution shall take effect immediately upon adoption.

PASSED AND ADOPTED THIS 8TH DAY OF MAY, 2024.

RESOLUTION 2024-06

A RESOLUTION OF THE TSR COMMUNITY DEVELOPMENT DISTRICT DESIGNATING DATES, TIMES AND LOCATIONS FOR REGULAR MEETINGS OF THE BOARD OF SUPERVISORS OF THE DISTRICT FOR FISCAL YEAR 2024/2025 AND PROVIDING FOR AN EFFECTIVE DATE

WHEREAS, the TSR Community Development District (“District”) is a local unit of special-purpose government created and existing pursuant to Chapter 190, *Florida Statutes*, being situated entirely within Pasco County, Florida; and

WHEREAS, the Board of Supervisors of the District (“Board”) is statutorily authorized to exercise the powers granted to the District; and

WHEREAS, all meetings of the Board shall be open to the public and governed by the provisions of Chapter 286, *Florida Statutes*; and

WHEREAS, the Board is statutorily required to file annually, with the local governing authority and the Florida Department of Economic Opportunity, a schedule of its regular meetings.

NOW, THEREFORE, BE IT RESOLVED BY THE BOARD OF SUPERVISORS OF THE TSR COMMUNITY DEVELOPMENT DISTRICT:

SECTION 1. ADOPTING REGULAR MEETING SCHEDULE. Regular meetings of the District’s Board shall be held during Fiscal Year 2024/2025 as provided on the schedule attached hereto as **Exhibit A**.

SECTION 2. FILING REQUIREMENT. In accordance with Section 189.015(1), *Florida Statutes*, the District’s Secretary is hereby directed to file a schedule of the District’s regular meetings annually with Pasco County and the Florida Department of Economic Opportunity.

SECTION 3. EFFECTIVE DATE. This Resolution shall take effect immediately upon adoption.

PASSED AND ADOPTED this 8th day of May, 2024.

COMMUNITY DEVELOPMENT DISTRICT

MINUTES

DRAFT
MINUTES OF MEETING
TSR
COMMUNITY DEVELOPMENT DISTRICT

The Board of Supervisors of the TSR Community Development District held a Regular Meeting on April 10, 2024, at 6:00 p.m., at the Welcome Center, 2500 Heart Pine Avenue, Odessa Florida 33556.

Present:

Mary Comella (via telephone)	Chair
Frank Stalzer	Vice Chair
Ray Szelest	Assistant Secretary
David Deenihan	Assistant Secretary

Also present:

Chuck Adams	District Manager
Alyssa Willson (via telephone)	District Counsel
Ryan Dugan	Kutak Rock, LLP
Barry Mazzoni	Operations Manager
Mark Yahn (via telephone)	SunScape Consulting, Inc., (SCI)
Peter Soety (via telephone)	SunScape Consulting, Inc., (SCI)
Rene Hlebak	WTS Starkey Ranch Lifestyle Director
Jennifer Niles	Starkey Ranch K-8 School Administrator
Corporal Borris	Pasco County Sheriff's Office

Residents present:

Karen Anderson	Matt Bruno	Bill Schumacher	Megan Cody
Linda Deenihan	Sonny Flora	Leslie Shutter	Kyle Medley

FIRST ORDER OF BUSINESS

Call to Order/Roll Call/Pledge of Allegiance

Mr. Adams called the meeting to order at 6:00 p.m. The Pledge of Allegiance was recited.

Supervisors Stalzer, Deenihan and Szelest were present. Supervisor Comella attended via telephone. One seat was vacant.

SECOND ORDER OF BUSINESS

Public Comments (agenda items) [3 minutes per person]

Disclaimer: These summary minutes are intended to only highlight the topics discussed, items being considered and actions taken. The audio is available upon request.

43 Resident Linda Deenihan asked about the status of researching the ability to reduce the
44 speed limit on Night Star Trail to 25 miles per hour (mph), which she believes is the speed limit
45 in every other area of Starkey Ranch. Mr. Mazzoni will follow up with the District Engineer.

46 Resident Bill Schumacher posed questions and Staff responded, as follows:

47 ➤ Regarding whether the MPOA is responsible for enforcing rules, such as addressing
48 those that leave trash bins in the driveway for a week, if the particular neighborhood does not
49 have an HOA, the answer is yes; the MPOA enforces rules under the Deed Restrictions and the
50 CDD enforces in the common areas of the CDD.

51 ➤ Regarding who is responsible for maintaining the long, now weathered, black fences in
52 the community across the street from the high school, it was noted that the homeowners are
53 responsible and the MPOA is responsible for enforcement.

54 Mr. Schumacher thanked the Board for installing landscaping at the end of Esplanade.
55 He expressed his concern about the possibility of accidents occurring and noted three instances
56 in the last week where he was almost ran over by scooters and motorized bikes.

57 ➤ Regarding if there is a hole in the Huckleberry lake, as he believes the water levels are
58 far below the water line compared to other lakes, Mr. Mazzoni stated that several ponds that
59 have not yet recovered. Mr. Adams stated that the lakes are a window to where the water
60 table is, which fluctuates in the rainy season.

61 Resident Megan Cody suggested initiating a program in which resident Dave Peterson
62 will, officially via the Sheriff's Department, teach bike safety classes. Mr. Adams stated that the
63 Declarations do not allow use of scooters on the sidewalks or roadways.

64 Resident Kyle Medley thanked the Board for installing the shrubs behind his residence
65 to fill in the open gap. He distributed and presented photographs of vehicle accidents, one
66 being a fatality 1,000 yards from his residence and another vehicle engulfed in flames 50' yards
67 from his residence, which damaged the recently installed shrubs. He expressed his opinion that
68 the homes with the fence are receiving special treatment; he believes his is the only home that
69 does not have a fence. He asked if there is a way to install a fence, as it was not possible to
70 extend the existing fence, due to Pasco County's future project. Mr. Stalzer and Mr. Mazzoni
71 will inspect the area and report their findings at the next meeting.

72 Resident Leslie Schutter voiced his concerns about speeding on Night Star Trail. He
73 thinks a crosswalk should be installed from the new park on Ranchers Gap and Night Star Trail.

74 Mr. Mazzoni noted the location of two nearby crosswalks; installing another would be difficult
75 because the roadway is curved.

76 Mr. Schutter asked for permission to install trees and bushes on CDD property, similar to
77 an area adjacent to his residence, and voiced his opinion that the landscapers have not
78 maintained that area. Mr. Schutter stated that his friends also complained about the
79 landscapers not maintaining in front of all three houses. Mr. Mazzoni will inspect the area and
80 contact LMP. Mr. Schutter asked if there are plans to install a sprinkler system.

81

82 **THIRD ORDER OF BUSINESS**

**Acceptance of Resignation of Supervisor
Ray Szelest [Seat 4]**

83

84

85 This item was presented following Item 4BIV.

86

87 **FOURTH ORDER OF BUSINESS**

**Consider Appointment to Qualified Elector
to Fill Unexpired Terms of Seat 3 and Seat
4; Terms Expires November 2024**

88

89

90

91 **A. Candidates**

92 Mr. Adams stated that, of the three candidates interested in filling vacant seats, Mr.
93 Escandon emailed at 5:45 p.m., advising that he is unable to attend the meeting due to a last-
94 minute conflict.

95 **I. Karen A. Anderson**

96 Candidate Karen Anderson spoke on her familiarity and involvement with the Starkey
97 Ranch community and experience as a Board Member; she expressed that she has a vested
98 interest in making sure the community maintains its equity, integrity and beauty.

99 **II. Matt Bruno**

100 Candidate Matt Bruno read his letter declaring his interest in Board Seat 3, which lists
101 his professional qualifications and desire to ensure that home values rise. He wants to work to
102 plan for a multi-year budget, including finding areas to cut costs and maximize value to
103 minimize yearly increases in fees.

104 **III. Alfredo J. Escandon**

105 There was no presentation from Mr. Escandon.

106 Mr. Stalzer nominated Ms. Karen A. Anderson to fill Seat 3. No other nominations were
107 made.

108

109

110

111

112

On MOTION by Mr. Stalzer and seconded by Mr. Szelest, with Mr. Stalzer, Mr. Szelest and Ms. Comella in favor and Mr. Deenihan dissenting, the appointment of Ms. Karen A. Anderson to Seat 3, was approved. [Motion passed 3-1]

113

114

115

- B. Administration of Oath of Office to Appointed Supervisors (the following will also be provided in a separate package)**

116

117

Ms. Comella left the meeting at 6:39 p.m.

118

119

120

Mr. Adams, a Notary of the State of Florida and duly authorized, administered the Oath of Office to Ms. Karen A. Anderson. He provided and briefly explained the following documents and suggested maintaining a separate email and files for CDD-related items:

121

I. Memorandum Regarding Required Ethics Training and Disclosure Filing

122

- **Sample Form 1 2023/Instructions**

123

II. Guide to Sunshine Amendment and Code of Ethics for Public Officers and Employees

124

125

III. Membership, Obligations and Responsibilities

126

IV. Form 8B – Memorandum of Voting Conflict

127

128

129

130

Ms. Willson stated that Mr. Adams' overview of the Sunshine Law and public records laws was thorough. She stressed to Ms. Anderson not to contact or speak with another CDD Board Member in person, via text, email, or social media and to use extreme caution when communicating regarding CDD business.

131

- **Acceptance of Resignation of Supervisor Ray Szelest [Seat 4]**

132

This item, previously the Third Order of Business, was presented out of order.

133

Mr. Adams presented Mr. Ray Szelest's resignation letter.

134

135

136

On MOTION by Mr. Deenihan and seconded by Mr. Stalzer, with all in favor, the resignation of Mr. Ray Szelest from Seat 4, was accepted.

137

138

139

- **Continued Consider Appointment to Qualified Elector to Fill Unexpired Term of Seat 4; Terms Expires November 2024**

140

141

Mr. Stalzer nominated Mr. Matt Bruno to fill Seat 4. No other nominations were made.

142

143

144

On MOTION by Mr. Stalzer and seconded by Mr. Deenihan, with all in favor, the appointment of Mr. Matt Bruno to Seat 4, was approved.

145

146

147

Mr. Adams asked Mr. Bruno to execute certain forms in the Supervisor’s package, noting these items were explained earlier in the meeting.

148

149

Mr. Adams, a Notary of the State of Florida and duly authorized, administered the Oath of Office to Mr. Matt Bruno.

150

151

FIFTH ORDER OF BUSINESS

Consideration of Resolution 2024-04, Appointing and Removing Officers of the District and Providing an Effective Date

153

154

155

Mr. Deenihan nominated the following slate:

156

157

Mary Comella Chair

158

Frank Stalzer Vice Chair

159

David Deenihan Assistant Secretary

160

Karen Anderson Assistant Secretary

161

Matt Bruno Assistant Secretary

162

No other nominations were made.

163

This Resolution removes the following:

164

Jason Silber Assistant Secretary

165

Raymond Szelest Assistant Secretary

166

The following prior appointments remain unaffected by this Resolution:

167

Chesley (Chuck) E. Adams, Jr. Secretary

168

Craig Wrathell Assistant Secretary

169

Craig Wrathell Treasurer

170

Jeff Pinder Assistant Treasurer

171

172

173

174

On MOTION by Mr. Deenihan and seconded by Mr. Stalzer, with all in favor, Resolution 2024-04, Appointing, as nominated, and Removing Officers of the District and Providing an Effective Date, was adopted.

175

176

177 **SIXTH ORDER OF BUSINESS**Continued Discussion/Consideration of
School Crosswalk at Long Spur and Tibbets
Street Intersection178
179
180

181 Starkey Ranch K-8 School Administrator Jennifer Niles introduced Corporal Boris, of the
182 Pasco County Sherrif's office. Ms. Niles stated, before the school can present its request to the
183 higher school officials, the school is seeking permission from various stakeholders to proceed
184 with changing the direction of the sidewalk and creating a crosswalk that would direct a large
185 number of students. The school is asking the Board's permission to remove certain CDD shrubs
186 to connect the sidewalks; she pointed out the locations on the photographs in the agenda. She
187 voiced her opinion that doing this would address existing safety concerns; the school would
188 incur all costs associated with the project.

189 Mr. Stalzer asked what entity would be responsible for repairs on CDD property.

190 Ms. Willson recommended issuing an Easement Agreement or a License Agreement
191 authorizing the work to be done on CDD property and asked if the Board wants to require the
192 entity to conduct the maintenance, as well. Mr. Adams suggested the CDD maintain the area
193 entering the right-of-way (ROW) and for the CDD's contractor to remove the shrubs. He asked
194 Ms. Niles to coordinate the project with Mr. Mazzoni.

195 Ms. Niles will notify the CDD once the School obtains official approval.

196

197 **On MOTION by Mr. Stalzer and seconded by Mr. Deenihan, with all in favor,**
198 **authorizing District Counsel to draft a License Agreement with Starkey Ranch K-**
199 **8 School, authorizing the removal of certain CDD shrubs as discussed, and**
200 **authorizing the Chair or Vice Chair to execute, was approved.**

201

202

203 Resident Sonny Flora, who runs the Community Garden, thanked the CDD for supporting
204 them and their efforts to make the community a better place for everyone to enjoy.

205

206 **SEVENTH ORDER OF BUSINESS****Discussion: Letter to Homeowner**
Regarding Pond Embankment Erosion

207

208

209 Mr. Mazzoni stated that he sent the final draft letter to Ms. Willson for her review. He
210 updated the new Board Members about homeowners causing pond embankment erosion

211 damage on CDD property when making improvements to their private property. He noted that
212 the Board might decide to charge the homeowner for the repair costs.

213

214 **EIGHTH ORDER OF BUSINESS**

**Update: Rangeland West Landscaping
215 Project**

216

217 Mr. Soety stated that fungicide is being applied to some areas this week. Water
218 saturation is being closely monitoring daily and he is being notified of any changes. Mr. Yahn
219 will inspect next week.

220 Mr. Yahn stated that the Landscape Architect deemed the project complete, so it will be
221 phased out and turned over to operations. He thinks the project was successful and that LMP
222 has done a good job with the quality of plant material and turf, installation and the irrigation
223 adjustments. It is now just a matter of having it settle down. Mr. Stalzer voiced his opinion that
224 it looks outstanding and is exactly how it was described. Mr. Mazzoni stated that the extra plant
225 material will be utilized on CDD property and that LMP was asked to provide a methodology
226 explaining the cost difference, which will be presented at the next meeting.

227

228 **NINTH ORDER OF BUSINESS**

**Acceptance of Unaudited Financial Reports
229 as of February 29, 2024**

230

231 Regarding delinquent accounts, Mr. Adams stated that he expects to receive an \$18,000
232 check from Starkey Ranch Asset tomorrow, which is for the prior year. The CDD received 41% of
233 the 2024 invoices that were mailed at the end of January. He authorized the transfer of \$2.5
234 million to the BankUnited investment account and plans to initiate another transfer later this
235 month, all of which will provide revenue to the CDD.

236 Discussion ensued regarding the reasons for the significantly high "irrigation repairs"
237 costs, the procedures in place to review and approve large invoice amounts, plans to switch to
238 solar and the costs associated with the upcoming Stancil Park and Parcel E projects.

239 Mr. Mazzoni stated that LMP is working on a Report about well installation, which he
240 will email to the Board and include on the next agenda. Mr. Bruno suggested Mr. Mazzoni
241 utilize Ms. Anderson when negotiating with Taylor Morrison (TM) on the turnover of Stancil
242 Park.

243 The financials were accepted.

244

245 TENTH ORDER OF BUSINESS

Approval of March 13, 2024 Regular
Meeting Minutes

246

247

248 **On MOTION by Mr. Stalzer and seconded by Mr. Deenihan, with all in favor,**
249 **the March 13, 2024 Regular Meeting Minutes, as presented, were approved.**

250

251

252 ELEVENTH ORDER OF BUSINESS

Action & Completed Items

253

254 Items 2, 4, 5, 6, 7, 8, 9, 10, 11, 12 and 14, were completed.

255

256 TWELFTH ORDER OF BUSINESS

Staff Reports

257

258 A. District Counsel: Kutak Rock, LLP

259 B. District Engineer: Johnson Engineering, Inc.

260 C. District Manager: Wrathell, Hunt and Associates, LLC

261 There were no reports from Staff.

- 262 • NEXT MEETING DATE: May 8, 2024 at 6:00 PM [Presentation of Fiscal Year
263 2024/2025 Proposed Budget]

- 264 ○ QUORUM CHECK

265 D. Lifestyle Director & Amenity Manager: Arch Amenities Group

266 Ms. Hlebak presented the Monthly Summary Report.

267 Discussion ensued regarding reasons for the delay in the Homestead Park pool repairs.

268 E. Operations Manager: Wrathell, Hunt and Associates, LLC

269 Mr. Mazzoni presented the Monthly Field Operations Report. He noted the following:

- 270 ➤ The District Engineer advised him that the stormwater system maintenance repairs
271 project will commence next week.

- 272 ➤ The hog trapper is scheduled to hunt this Friday; five hogs were caught in the last
273 month. Activity is mostly occurring on Barbour Trail. He believes the controlled burns and the
274 CDD's efforts have helped minimize the damage that took place last year.

- 275 ➤ A mockup of the proposed landscape maintenance area was distributed.

276 Mr. Mazzoni will work with Ms. Willson on a draft Use Agreement and Contract
277 Addendum with LMP and work with LMP to define the maintenance yard before scheduling the
278 survey, all of which will be presented at the next meeting. The Developer has not yet conveyed

279 the property to the CDD. Mr. Mazzone will suggest not to extend the LMP contract, if all these
280 items are not finalized by July.

- 281 ➤ The sidewalk inspections identified a lot of grates that need to be added .
- 282 ➤ The Stencil Park residents’ list of concerns to the home builder was requested.
- 283 ➤ LMP and other vendors were notified of the April 30, 2024 deadline to submit proposals
284 to incorporate into the proposed Fiscal Year 2025 budget.

285

286 **THIRTEENTH ORDER OF BUSINESS**

Supervisors’ Requests

287

288 Mr. Stalzer asked to schedule a budget workshop. Mr. Adams will schedule a workshop
289 on May 8, 2024 at 4:00 p.m., before the 6:00 p.m. regular meeting.

290

291 **FOURTEENTH ORDER OF BUSINESS**

**Public Comments (non-agenda items) [3
292 minutes per person]**

293

294 Mr. Medley asked if a solution to his earlier request will be presented at the next
295 meeting. Mr. Stalzer stated that he and Mr. Mazzone will inspect the property and report their
296 findings at the next meeting.

297 A resident asked when the first bond is due and what the terms are. Mr. Adams stated
298 that the amortization schedule is posted on the CDD website.

299

300 **FIFTEENTH ORDER OF BUSINESS**

Adjournment

301

302 **On MOTION by Mr. Deenihan and seconded by Ms. Anderson, with all in favor,**
303 **the meeting adjourned at 7:55 p.m.**

Monthly Summary Report

April 2024

Submitted by:
Renee Hlebak, Starkey Ranch Lifestyle Director
Alex Murphy, Operations Director

APRIL PROGRAM HIGHLIGHTS

PROGRAM	CATEGORY
One Blood Bus	Health/Educational
Yoga in the WC	Fitness
Vax-on-Site	Health/Educational
Music in the Park	Family Social
Music Bingo	Adult Social
On-Spot Derm	Health/Educational
Cystic Fibrosis Walk	Family Social
Community Garage Sale	Open Event
Final 4	Family Social
Kids Night Out	Kid's Social
Food Truck Friday	Family Social
Yoga	Fitness

March Madness Winners!

THANK YOU TO EVERYONE WHO PARTICIPATED IN OUR 2024 MARCH MADNESS BRACKETS!

CONGRATULATIONS TO OUR TWO WINNERS:
ERIC CICCOCIOPPO (WOMEN'S) & MATT BERTONCINI (MEN'S)

PLEASE STOP BY THE WELCOME CENTER TO PICK-UP YOUR \$25 HOOTER'S GIFT CARD!

MUSIC IN THE PARK
WHITFIELD PARK

COME JOIN US FOR SOME LIVE MUSIC FROM TRIPLE PLAY!

DON'T FORGET TO BRING THE FAMILY, CHAIRS, BLANKETS, AND YOUR APPETITE AS WE WILL HAVE FOOD TRUCKS ON SITE!

April 12th | 6-8PM

MUSIC BINGO

Jam out to snippets of your favorite songs with DJ Anthony, while playing competitively against other music lovers for a chance to win some gift cards!

Mark off the songs on your card as you hear them and yell BINGO when you have 5 in a row!

April 18th, 2024
6 - 8 PM
Cunningham Hall

RSVP: fun@ourstarkeyranch.com

Community Garage Sale

Are you looking to declutter your space and make some extra cash? Come and be a part of our Garage Sale on April 27th, 8AM - 2PM!

If you would like us to advertise your garage sale, please [CLICK HERE](#) and sign up!

Lists of participants will be sent out to all the residents and can also be picked up at the Starkey Ranch Welcome Center at 8am on April 27th.

We will be taking garage sale sign ups until April 22nd!

APRIL AMENITY RENTALS

AMENITY LOCATION	FREQUENCY	REVENUE
Cunningham Hall	4 Days/21 Hours	\$1050
Whitfield Park Pavilion	3 Days/13 Hours	\$195
Homestead Park Pavilion	3 Days/11 Hours	\$165
Albritton Park Pavilion	3 Days/16 Hours	\$240
<p>***Rentals usually take place Friday – Sunday, pending Lifestyle Programs and needed access to the facilities. Resident Clubs, Fitness and Community Associations are not included in these numbers. Deposits for Cunningham Hall and Damage Costs are not included. Damage costs are rarely charged/a concern after rentals. Deposit Checks for Cunningham Hall are held until the Monday after the rental, they are then returned or shred per the resident’s request.***</p>		

FACILITY OPERATIONS & MAINTENANCE

ITEM	STATUS	CONCLUSION
Playground Repairs	Complete	Bolts were tightened, broken swings were replaced, springers repaired and teeter totters were realigned.
Homestead Park Pool & Deck Issues	Complete	Pool is open!
Homestead Park Slide	In Progress	Engineer's Report has requested we look into replacement options for the tower. In talks with Earthscape (Built the slide) & Kompan (Built/Created all other equipment) on quotes and options to best present to the Board. This will be a fairly large cost that will need to be discussed in detail once we have gathered all the information to best present to the Board.
Gator/Field Cart Maintenance	Complete	New Gator went to the shop for service and a few check, but we also had a few issues with the old one working. Both are up and running, but the old one is not going to make too much longer.
Paver Repairs	In Progress	Inspecting all areas with pavers from pavilions to round-a-bouts for issues and hazards. Repairing as we go.
Updating Park Bathrooms	In Progress	From lighter paint to replacing soap dispensers to a new floor product. We have found the colors and products that work best and going park to park to complete.
Touch-up painting, pressure washing, filling holes at the dog parks, replacing boards & bricks on pedestrian walk ways.	In Progress	Ongoing projects in the community continually needing to be addressed. This does not include daily Park Attendant duties such as trash, park checks, rentals, etc.

MAY PROGRAM FORECAST

PROGRAM	DATE
Vax-on-Site & Free Yoga	May 1st
Harry Potter Day	May 2nd
One Blood Bus & May the 4th Be with You	May 4th
Cinco De Mayo	May 5th
Drink This, Make That	May 8th
3D Mobile Mammography	May 11th
Mother's Day Brunch	May 12th
Drum Circle	May 16th
On Spot Derm & Wine Club Event	May 17th
Murder Mystery	May 18th
Hurricane Prep Seminar	May 25th
Kona Ice	May 24th & 27th
Kid's Night Out	May 31st
Food Truck Friday	Every Friday
Yoga	Every Monday

**MAY THE
4TH BE
WITH
YOU**

COME JOIN THE LIFESTYLE TEAM FOR YOUR OFFICIAL JEDI TRAINING AND MAKE YOUR OWN LIGHTSABER!

*** COSTUMES ENCOURAGED ***

May 4th
10am - 12 pm
Homestead Park
Fee: \$2

**RSVP:
FUN@OURSTARKEYRANCH.COM**

HURRICANE PREPERATION SEMINAR

The course will teach residents how to prepare for hurricanes and their aftermath. We learn how to properly build a family emergency kit and create an emergency plan.

Starkey Ranch Welcome Center
May 25, 2024
10am - 12pm

RSVP: FUN@OURSTARKEYRANCH.COM

DRUM CIRCLE

**MAY 16 | 6-7PM
CUNNINGHAM HALL**

Please join us for a Drum Circle with Caroline! She is a licensed mental health, counselor and certified Adlerian psychotherapist, and trained/certified in therapeutic drumming in a group setting.

The class will consist of a 1 hour drumming workshop where you will learn the basics of drumming, and connect with other community members.

If you have your own instruments, we encourage you to bring them! Please let us know when you RSVP!

Spots are limited

RSVP: FUN@OURSTARKEYRANCH.COM

Harry Potter Day

Calling all witches/wizards and even Muggles to join on the fun to search Whitfield Park for the flying quiddichs!

FEE: \$2

RSVP REQUIRED

May 2, 2023
Whitfield Park
4 - 7 PM

THANK YOU.

COMMUNITY DEVELOPMENT DISTRICT

**STAFF
REPORTS
E**

Wrathell, Hunt and Associates, LLC

TO: TSR Board of Supervisors
FROM: Barry Mazzoni – Operations Manager
DATE: May 1, 2024
SUBJECT: Status Report – Field Operations

APRIL MEETING Q&A FOLLOW-UP:

13044 WILDGRASS TRAIL LANDSCAPING / BORDER WALL CONCERN: The relative distance from the houses behind the wall and 13044 WGT are nearly identical, approximately 110-112 feet from SR-54. Below are location photos, plus street view comparisons between the home on Wildgrass and the homes on Burns Drive.

Extra Features (Card: 1 of 1)				
Line	Code	Description	Year	Units
1	RDWC	CONCRETE DRIVEWAY	2019	80
2	RBRKSAN	BRICK SAND BASE	2019	779
3	RWIFENCE	WROUGHT IRON FENCE	2021	696

Sales History			
Previous Owner:		HOMES BY WEST BAY LLC	
Month/Year	Book/Page	Type	DOR Code
12/2019	10018 / 0453	Warranty Deed	01

Operations Note: According to county records, a wrought iron fence was installed by the current property owners in 2021, Post-construction. The home was closed in Dec. 2019

SPEED SIGN UPDATE– NIGHT STAR: The District Engineer is pursuing this issue with Pasco County and we hope to provide an update on this item at the May meeting.

PARCEL NEAR 13917 NIGHT STAR TRAIL: Operations reviewed the parcel off Night Star Trail. This area appears to be planted with unirrigated Bahia grass, which tends to grow best during late Spring and the summer months as it prefers full sun. With respect to the lack of trees, there are other surrounding areas with similar design elements. If the board wishes to change the turf or irrigation in this area, please advise and we will pursue quotes.

OPERATIONS UPDATES

COMMON AREAS / AMENITIES

PAVER REPAIR ESPLANADE:

Paver damage was discovered along the roundabout between Ranchers Gap and Myrica Dr, near Esplanade. Steve from the Amenities team removed the paver section, put sand down, and restored the area. Operations would like to thank Steve for his help, support, and expertise on this project. Operations is reviewing the rest of the roundabout for additional repairs.

STANSIL PARK UPDATE: Operations receive a brief list of generalized items from residents of Stansil Park on April 19th. We requested additional details on the list of concerns provided. Currently, the homebuilder has not requested a turnover inspection of the Stansil Park Area.

HOMESTEAD POOL COMPLETION: The final pour for the pool deck was completed on Friday, April 26th. The pool is projected to open Friday, May 3rd.

HEART PINE AVE BRIDGE: The pallet of pavers was delivered to the Welcome Center on Monday, April 22nd. The repair crew from Standard Brick Pavers is scheduled to complete the repair on Saturday, May 4th and move the remaining pavers to storage at Cunningham Park.

LANDSCAPING / ARBOR CARE

DAVEY TREE WORK COMPLETE: The spring projects included fertilization using Bio-char applications and structural pruning. Pruning was completed at the following locations:

- Long Spur, (Starting just East of bridge near park, continuing all the way to Fence Post Drive) including (89) oaks and (68) Sycamore trees.
- Fence Post/Long Spur Park: forty-five (45) Oaks, and two (2) Sycamore trees.
- Gunn Highway, from Rangeland to SR 54: twenty-seven (27) Oaks, and nine (9) Sycamore trees.
- Berry Pick Trail Pond: nineteen (19) Oaks, fifteen (15) Elms, and twenty-seven (27) Sycamore trees.
- Riders Pass and Lions Pine Park: thirteen (13) Oaks, seven (7) Elms, and two (2) Sycamore trees.
- Chapin Pass and Lion Pine Park: fifteen (15) Oaks, seven (7) Elms, two (2) Sycamores, and ten (10) Maple trees.
- Elevate ten (10) Sycamore trees along Pine Gap Spur from Fence Post to Wild Grass trail. Slightly thin out trees for proper growth structure.

HUCKLEBERRY POND TREE INJECTION:

Completed the third injection of the Live Oak on West Side of the pond that has old lightning strike damage. The tree was injected with Vos Jet and fungicide. Injection will not guarantee to sustain the life of the tree and we continue to monitor the tree for signs of improvement or further decline.

GUNN HIGHWAY / LONG SPUR PLANT REMOVAL: Per the Board's direction to review sightlines along the roadways, Operations is recommending the removal of the palmettos and replacing them with grasses. This project is expected to be completed in May.

2024-25 LANDSCAPING ENHANCEMENT PROPOSALS FROM LMP: In advance of the budget discussion for the next fiscal year, we elicited proposal from LMP for any recommended enhancement project. The fifteen (15) areas that have been proposed included parts of Whitfield Park, Albritton Park, and Homestead Park, the east entrance off SR-54 & Cattle Gap Trail, the entrance off Starkey Blvd/ Rangeland West, the Monroe Jogging Path, the Monroe Meadows Common Area, the Barbour Trail Roundabout, the Mellon Drive Roundabout, and the Wiregrass Trail Roadway. Sunscape Consulting and Operations are actively reviewing the proposals and will make the final recommendations for the projects we believe the Board should consider for inclusion in the O&M 2024-25 budget.

RANGELAND EAST SOD PROPOSAL: Upon successful completion of the Rangeland West project during the 2023-2024 fiscal year, we requested a proposal to replace the Bahia turf with Empire Zoysia. The estimate for this project is \$261,599.80, which includes 186,857 Sq. ft. of sod. Any irrigation modifications would be a sperate proposal for this project. This proposal will be made available to the Board should they wish to consider this project for inclusion in the O&M 2024-25 budget.

LANDSCAPING MAINTENANCE AREA: Operations has requested the draft of a use agreement, in substantial form, from District Counsel. Once provided, we will pursue finalized the framework of the agreement for the Board's review. Operations has set a deadline of the July meeting to realize and complete this project. If the parties cannot agree by July, Operations recommends putting this project aside.

LAKES & PONDS

MEETING WITH SOLITUDE: TSR Operations is scheduled to meet with the District Manager and our service team from SOLitude on April 30th to review the existing service scope of work and discuss opportunities to improve services. SOLitude will be submitting a list of their recommendations for the Fiscal 24-25 Budget, and they are planning to attend the June 12th Board of Supervisors meeting. On a go forward basis, Operations has requested that SOLitude provide a detailed quarterly update of the ponds to be shared back with the Board of Supervisors.

Service Notes from Tech: This month services were completed. Sites were treated for shoreline weeds, algae, and submersed weeds. All sites requesting service were treated. Trash was removed from ponds. Selected pond sites were dyed, as per the agreement.

MISC UPDATES

MEETING & DISTRICT TOUR WITH EGIS INSURANCE & RISK ADVISORS: TSR Operations Manager and the Lifestyle lead met with the TSR CDD's insurance agency to tour the District on April 24th. Overall, the inspector appeared to be satisfied with the District's rules and maintenance programs. We expect a post tour report to be provided by EGIS in the next several weeks.

SUMMARY OF TRINITY ODESSA LEADERSHIP COUNCIL MEETING WITH COMMISSIONER STARKEY (4/18/24):

- Commissioner Starkey requested that community leaders share this information and the county's initiatives with residents.
- It was noted that Commissioner Starkey's District represents 117 planned communities.
- Pasco County is averaging 70 new residents a day and is the most rapidly developing county in the state.
- Patrick Arotin from Code Compliance provided an introduction to Code Compliance on what they can and cannot do. They are not sworn officers, so they do not have any arresting powers. If you see trash or debris, you can call that into Code. They will not go to homeless encampments due to safety concerns. As you are aware, being homeless is not illegal. Patrick also mentioned that you can call in any code complaints, but they cannot be anonymous. The caller must provide name and address. There are two deputies assigned per zone and that equals 1 officer per 30 sq. miles of the county. They address 35,000 to 40,000 events annually. Their response time is about 4.9 days currently. PC Code Compliance is conducting town halls three times per year.
- Pasco County Sheriff's Office (PCSO) had 197,000 calls for service in 2023. Pasco County Sheriff's office spoke about trespassing and how that is enforced. The land/business owner needs to have a trespass agreement in place for it to be enforced. In regard to businesses, it is only enforced when the business is closed. If it is during business hours, it is up to the manager/operator to call the trespassing into the non-emergency number. It was also mentioned that the PCSO cannot do proactive enforcement in gated communities. They can in other locations and community as calls for service allow them to do so.
- It was mentioned that they do offer parking enforcement, but that is provided by a volunteer unit. There was a handout for crime prevention tips, which staff will scan and share with community residents.
- Tina Russo from the Metropolitan Planning Organization spoke about the Orange Belt Trail. Orange Belt Trail (OBT) is a proposed regional multiuse trail spanning approximately 37 miles through Pasco County. More information can be found about the trail and its development at <https://orangebelttrail.com/>. The segment of the OBT from Little Rd to SR 54 is on the FDOT Work program for construction in 25/26.
- David Engel from Planning and Economic Growth gave a presentation on what's coming to Pasco County
